Telefónica's Leadership Self-Diagnosis
FAQs

1. Introduction

Welcome to your Leadership Self-diagnosis Frequently Asked Questions (FAQ) Guide.

This document is designed to answer common questions and provide clarity for all participants taking part in the leadership self-diagnosis across Telefónica. We want you to feel well-informed and supported throughout the process, with a clear understanding of what involves, why it matters, and what you can expect.

Below you'll find straightforward answers to the most frequently asked questions, to help you navigate the self-diagnosis with confidence and ease. If you have any additional questions that aren't covered here, please reach out to Universitas team or your People contact for support.

2. FAQs

Q1. What is this leadership self-diagnosis?

Telefónica's *leadership self-diagnosis* is an experience designed to strengthen leadership capabilities and support Telefónica's leadership evolution toward being more digital, simpler, and more customer-driven, aligned with the new strategic plan Transform & Grow. This experience enables leaders to get a diagnosis of where they stand with regards to the newly defined Leadership Model (6 core leadership skills) and guides them in preparing a customized development plan to get the most out of the Accelerate Impact journey.

Q2. What is the purpose of this self-diagnosis, and how will you benefit from it?

The talent self-diagnosis is designed to build self-awareness and give you a clearer, more objective view of how you lead today—your leadership skills—so you can identify strengths, development opportunities, and where to focus for maximum impact.

Q3. Who is conducting this self-diagnosis?

Telefónica has partnered with Korn Ferry, a leading executive development consulting firm whose purpose is to enable people and organizations to exceed their potential. Together, we are embarking on this initiative to collectively achieve our ambitious goals for the new future organization of TELEFÓNICA.

Q4. Will I get a report after self-diagnosis?

Upon completion of the online self-diagnosis, you will receive two reports:

- **Telefónica's Leadership Snapshot:** This report gives you a clear, visual snapshot of your position within Telefónica's Leadership Model.

***Este documento está clasificado como PUBLICO por TELEFÓNICA.
***This document is classified as PUBLIC by TELEFÓNICA.

- **In-depth Report**: This report goes beyond what is visible on the surface. While skills and competencies reflect what you do, there is much more beneath, your traits and drivers, which influence why you act the way you do. By looking at the additional elements from this report, you will be able to get a deeper understanding the root levers that can power the development of the 6 Telefónica core leadership skills.

Q5. How will I interpret my self-diagnosis results?

To help you interpret your results and get the most value from them, you will have access to a dynamic, AI-powered feedback experience that brings your insights to life and supports your reflection.

Once you have completed the self-diagnosis, the avatar will guide you through the interpretation of your results, helping you connect insights across sections and identify practical development suggestions and recommendations.

In page 5 of Playbook, you will find a set of prompts designed to help you get the most from your conversation with the avatar and maximise its value.

Remember the benchmark used for result parametrization is global and multi-sector, and therefore the interpretation you will make will be essential for a high-impact specific role-based development plan.

Q6. What are the components of the self-diagnosis and how much time will they take to complete?

You will complete an online self-diagnosis that looks at who you are as a leader, consisting of three modules: Competencies (including Leadership skills), Traits and Drivers.

It takes approximately 60 minutes. This is a guideline only. You can take the time you need, as the time spent does not affect the results. We recommend finding a quiet space and answering naturally, without rushing or overthinking.

Q7. Who has access to the self-diagnosis results?

Your privacy is of utmost importance to us. Individual results will be accessible to the participant and the designated members of the People team.

Data may also be used to inform talent, development actions and broader insights, always preserving individual confidentiality.

If you have any concerns about access to your self-diagnosis results, please do not hesitate to contact the People team for clarification and reassurance.

Q8. Is my participation in self-diagnosis compulsory?

While participation is voluntary, we highly encourage you to take advantage of this self-diagnosis, designed to provide meaningful insights that will support your growth as a leader. Completing the self-diagnosis will offer you a powerful, personal view of your leadership profile and help you make the most of your Accelerate Impact development journey.
